Correction

RETRACTION

The authors of the retraction note that Ref. 1 in their retraction text [Pushparaj PN, et al. (2009) Sphingosine kinase 1 is pivotal for Fe ε RI-mediated mast cell signaling and functional responses in vitro and in vivo. J Immunol 183:221–227] has not been retracted.

Retraction and Correction

RETRACTION

IMMUNOLOGY

The undersigned authors wish to note the following: “The panels in Fig. 2B1 and 2D3 are identical and used in a later paper (1), now retracted. The panels in Fig. 3E4 and 3E9 are used in two later publications, one that has been retracted (2) and one that has an expression of concern (3). Although we believe the overall message of the paper is correct, we can no longer consider the findings to be reliable. Accordingly, we wish to retract the paper. We sincerely apologize for the inconvenience caused to other investigators.”

Peter N. Pushparaj
