Correction. In the article “Involvement of Escherichia coli dnaZ gene product in DNA elongation in vitro” by Sue Wickner and Jerard Hurwitz, which appeared in the April 1976 issue of Proc. Natl. Acad. Sci. USA 73, 1053–1057, the authors have requested the following changes. On p. 1053, second column, the second paragraph should begin: “We have found that the conversion of φX174 DNA to RFII requires four dNTPs, Mg^{2+}, ATP, and at least 10 purified protein fractions: dnaB, C(D), and G gene products, DNA binding protein, DNA polymerase III, DNA elongation factors I and II, and three other E. coli protein preparations which are as yet genetically undefined [referred to as DNA replication factors X, Y, and Z (16)].”

Correction. In the article “Biological activity of catecholamines covalently linked to synthetic polymers: Proof of immobilized drug theory” by M. S. Verlander, J. C. Venter, M. Goodman, N. O. Kaplan, and B. Sacs, which appeared in the April 1976 issue of Proc. Natl. Acad. Sci. USA 73, 1009–1013, the authors have requested the following change. In the list of authors’ names on p. 1009, Saks should be Sacs.
