Antibody reactivity to CNS antigens is shown as a black square, with a white arrow indicating whether it is up- or down-regulated relative to HC (for RRMS and PPMS) or RRMS (for SPMS). CNP, 2',3'-cyclic nucleotide 3'-phosphodiesterase; MOBP, myelin-associated oligodendrocytic basic protein; MOG, myelin/oligodendrocyte glycoprotein; MBP, myelin basic protein; P2, myelin protein 2; OSP, oligodendrocyte-specific protein; PLP, proteolipid protein; AB, amyloid β.
