

Correction

NEUROSCIENCE

Correction for “Intrinsic functional architecture predicts electrically evoked responses in the human brain,” by Corey J. Keller, Stephan Bickel, László Entz, Istvan Ulbert, Michael P. Milham, Clare Kelly, and Ashesh D. Mehta, which appeared in issue 25, June 21, 2011, of *Proc Natl Acad Sci USA* (108:10308–10313; first published June 2, 2011; 10.1073/pnas.1019750108).

The authors note that, due to a printer’s error, the legends for Figs. 2 and 3 appeared incorrectly. Both the online and print versions have been corrected.
